

FOR IMMEDIATE RELEASE

Meriplex Communications is pleased to announce its participation in the 2012 Offshore Technology

HOUSTON, 24 April 2012 – Meriplex Communications, a leading innovator in designing, implementing and managing enterprise voice, data and communications infrastructures will highlight its products and solutions at the 2012 Offshore Technology Conference to be held April 30th thru May 3rd.

“Fueled by the expanding global footprint of energy enterprises, a need for genuine world-wide support has propelled Meriplex to create an exclusive division specializing in the infrastructure and communication needs of the oil, gas and chemical industries” said David Henley, President of Meriplex. “As an emerging Cisco Multinational Master Specialized Partner our natural next step is showcasing our skills at the Offshore Technology Conference”

Located at booth 11221 in the Pavilion, Meriplex design and network engineers will be on hand to share our expertise and perspective on next-generation technologies including voice (SIP Solutions), data (MPLS), and Cisco solutions for interconnecting an enterprises’ business locations both locally and around the globe. Meriplex will provide a variety of demonstrations and prizes throughout each day at the Offshore Technology Conference.

Along with offering complex voice and data communications, Meriplex is one of only four Cisco Gold Partners headquartered in the United States with both a Cisco Masters Unified Communications Specialization and a Multinational Specialization across multiple global theaters. These Cisco designations recognizes Meriplex Communications as having fulfilled the requirements to design, engineer, deploy and support highly sophisticated Cisco Unified Communications solutions across multiple countries.

About Meriplex Communications

Founded in 2001 by Arthur Henley, co-holder of an early VoIP patent #5526353, Meriplex Communications is a Texas-based enhanced service provider specializing in communication solutions for the enterprise market. The company's business is organized into four areas, including Network Services (Global Internet, MPLS, and SIP solutions); Cisco VAR (Unified Communications, routing and switching, security, datacenter and wireless LAN); Managed Services (24 x 7 x 365 Certified NOC); and Structured Cabling. Meriplex Communications services business customers around the globe. For more information, visit <http://www.meriplex.com>.
